14. UX Principles

Every page must answer:

What?

What food do you sell?

Why?

Why choose The Zaika?

How?

How can I order?

Trust?

Can I trust you?

Action?

What should I do next?

15. Brand North Star

When someone lands on The Zaika website, they should feel:

"This doesn't look like a local cloud kitchen. This feels like a premium food brand that I can trust and order from immediately."

That perception alone can increase conversion rates, repeat orders, and direct ordering adoption far more than adding more menu items or discounts.
